A. Content & Audience

1. Did your peers clearly understand your site's purpose and target audience?

   Yes

2. What suggestions did they make to improve your site's content or messaging?

   Overall, the only the suggestion that they made was to reduce the size of the images.

B. Design & User Experience

3. How did your peers respond to your site's design (layout, color, typography, or organization)?

   They said that it was simple, yet very effective.

4. Did they find the design effective in communicating your message and engaging users?

   Yes.

C. Functionality & Performance

5. What issues did your peers identify with features or interactivity on your site?

   The only issue that my peers had was that the images were not sized properly on mobile devices.

6. Did they note any pages or elements that loaded slowly or inconsistently across devices or browsers?

   No

D. Accessibility & Usability

7. What feedback did you receive about accessibility (e.g., alt text, color contrast, keyboard navigation)?

   Once again, the only thing that they noted on was the fact that my image size was very big, and that I should reduce it.

8. What can you improve to make your site more inclusive and user-friendly?

   Reduce image size, look into accessibility techniques

E. Action Plan

9. What did your peers like most about your site?

   They liked the overall simple design of the website and how I made do with the white/light green background colors within styling, and my video.

10. What two improvements will you make based on their feedback, and how will you implement them?

    The only improvement that was generally needed was reducing the image size of my four images, and I will do it by messing around with the image size and seeing what works and what doesn't.
