

MatchWatch

A product pitch by [Mustaan Mogaji-Oleolo]

The Problem

- Many people of today often find themselves having trouble finding the perfect watch for their next outing, event, or party.
- Even if they find the right website, they have to search through hundreds of watches that may not even be **available** to access.

Your Solution

- My Solution? MatchWatch
- MatchWatch is a mobile app that **matches** watches posted online that are tailored to your next fit.
- How is MatchWatch different?
 - Matchwatch offers direct access to watches online and can even apply deals that you find online, saving you, your money, **and** your next gathering from a total disaster!

Website Type

- I think the type of website that would be best is a Business website since I feel as though MatchWatch would in of itself be a business that would thrive better if it has a business website (or business-feeling website) to show it off.

Software Development Process

- I feel as though I'm going to use Waterfall, as I feel as though both the Agile and Scrum development processes are processes that would a lot better for development teams and not a solo developer such as myself.

Target Audience

- Meet Rodney!
 - 34 year old African American Male.
 - Based in Manhattan, New York
 - Teaches Music at NYU and has an annual income of about ~\$80,000
 - He generally uses the internet to jazz and watch his favorite Nollywood show “No More Marriage”.
 - Why would he go to MatchWatch?
 - He typically tends to go jazz shows every Wednesday night, but he decides he wants to be different, he wants to snag a black watch with grey undertones to match his blazer.

Target Audience

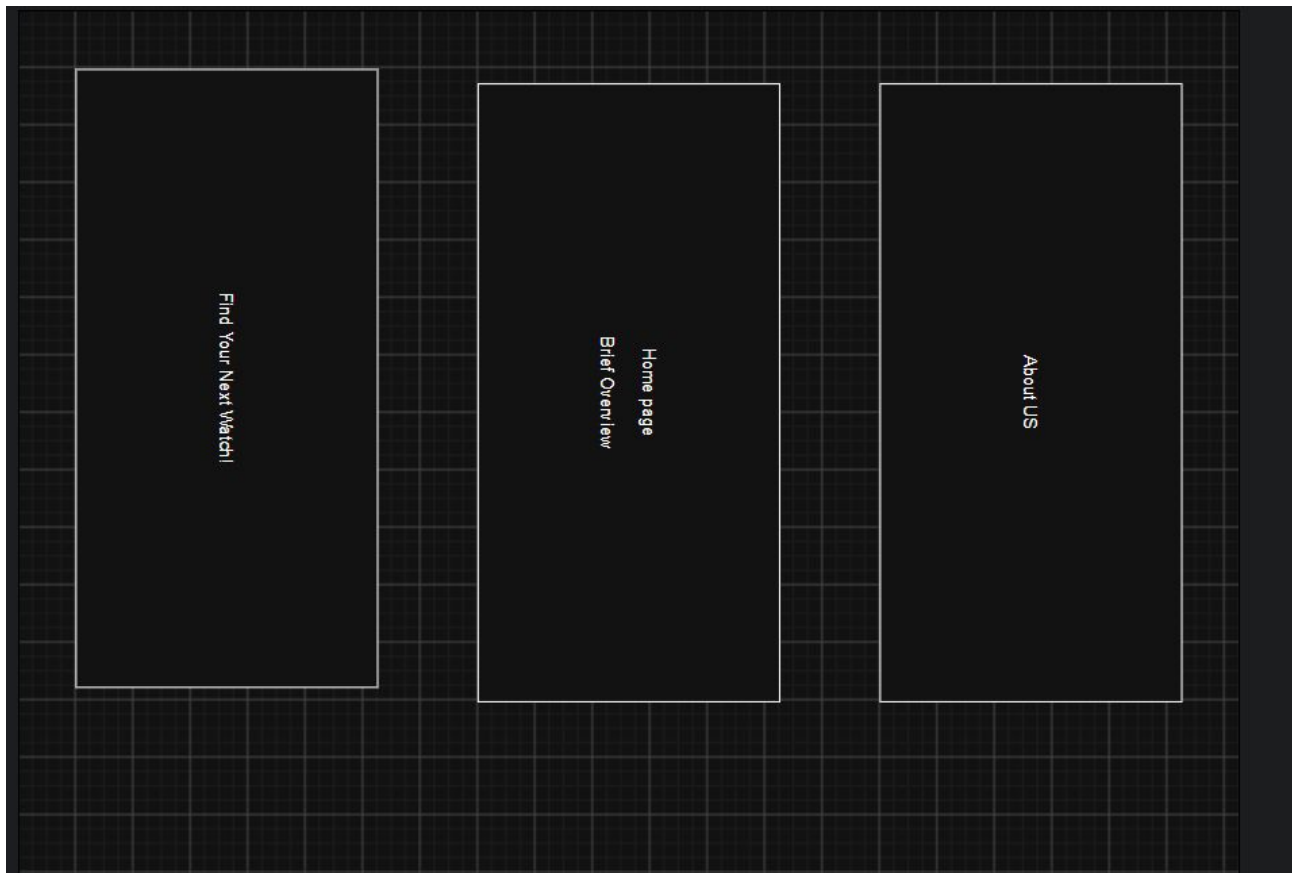

- Meet Linda!
 - 22 year old Female College Senior based in Massachusetts
 - She's a student studying business at UMass Boston, where she also works on-campus at her university's diner.
 - Generally uses the internet to text her friends.
 - Why would she use MatchWatch?
 - She has an actual business meeting that's tied to a recent career fair that she went to, and she wants to look presentable.

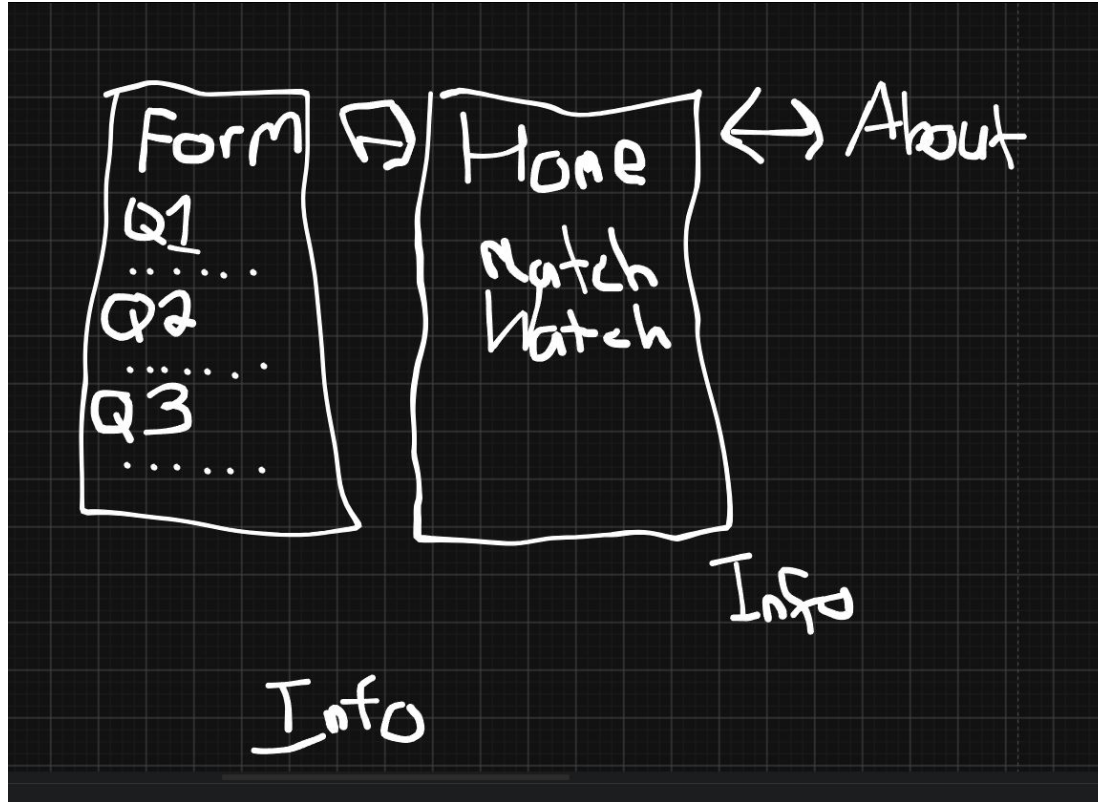

Key Content & Features

- Users will access the main page and be given a brief overview of MatchWatch.
- Two headings will pop up, one to the left and one to the right. One will be called “Find your Watch” and the other will be called “About MatchWatch”
- “Find Your Watch” will bring you to a form that when given responses, will output a picture of your next watch and a link to the site where you can buy it!
- “About MatchWatch” will bring you to where you can find the contact information for MatchWatch’s developer!

Pitch Summary

MatchWatch is needed because without it, people will continue to have trouble finding a watch for their next outing or social gathering! MatchWatch solves this problem while also giving you the ability to save money on your next watch purchase, and in today's economy, I think everyone wants to save!

Feedback Questions

Include any specific areas where you'd like peer or instructor feedback.

- Is the solution clear?
- Are the features too much/little?
- Is the target audience well-defined?
